

Double access door with larger platform which allows safe observation of the mixing process by one or more persons

Front conveyor

High adjustable draw bar

Front conveyor (optional sliding conveyor)

Side door

Two speed gear box

Back conveyor

Vertical system

The full welded tub provides superior strength and durability. The mixing efficiently process entire round and rectangular bales and meet the needs of a wide range of dairy or cattle farm tanks of a wide range of capacities available.

The mixing chamber is fitted to a fully independent chassis utilizing four load cells. With this design we will be able to measure all materials loaded into or onto the tub with complete accuracy, allowing us to create a recipe for better mix appearance.

Several options are available for our vertical machines to adapt the mixer to your needs. The MV-12 has a larger platform which allows safe observation of the mixing process by one or more persons.

More than 25 years of experience allows TATOMA to provide a very accurate machine built with high quality materials to deliver many years of trouble free service.

Foldable silvator

Twin wheels

Auger

Hydraulic counter knives

Electro-hydraulic controls

Programmable scale

Airlock low ring

Heavy duty undercarriage

4 load sensors
